

UTKU ALTAN ÖZKALE

Industrial Engineer

+90 532 486 3979 | utkuozkale@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Industrial Engineer specializing in digital transformation, process automation, and strategic problem-solving. Focused on developing AI-driven solutions to optimize operational efficiency and streamline business processes.

WORK EXPERIENCE

Serdar Plastik | Project Engineer (Student) | Oct 2025 - Jun 2026

- Architecting and developing custom AI/ML-powered Material Requirements Planning (MRP) module with intelligent safety stock calculations and predictive analytics for demand forecast using machine learning algorithms. (View on [Github](#))

Bozankaya | Purchasing Intern | Aug - Sept 2025

- Developed a Python-based automation solution (Pandas, Openpyxl) for manual Excel processes, achieving an 83% improvement in time efficiency. Transformed repetitive data entry and reporting processes into streamlined automated pipelines

ULAK Haberleşme | ERP Intern | Jul - Aug 2025

- Designed end-to-end Asset & Inventory Tracking System using Python, establishing real-time visibility across organizational resources. (View on [Github](#))

ESEN Sistem Entegrasyon | Software Intern | Jul - Aug 2024

- Performed data analysis and visualization using Python libraries such as Matplotlib and Tkinter.

EMGE | Quality Control Intern | Jan - Feb 2024

- Conducted precision measurements and quality inspections using CMM machines and PC-DMIS software.
-

PROJECTS & ENTREPRENEURSHIP

AI-Driven Enterprise Resource Planning (ERP) Ecosystem (In Development)

- Architecting a comprehensive, AI-centric framework designed to automate end-to-end business operations by replacing manual workflows with predictive intelligence. The system centralizes decision-making across all organizational functions using advanced data models to optimize resource allocation and industrial logistics.

Teklif's | Co-Founder & Business Analyst

- Teklif's, startup which is an e-commerce platform that introduces competitive bidding model to online retail
- Conducted comprehensive research to define system requirements and functional capabilities, determining the essential technical and operational needs of the platform.
- Managed risk assessment and regulatory compliance by analyzing KVKK (Data Privacy) obligations and modeling potential risk scenarios to ensure secure operations.

RAPID UAV Project (Neostellar) | Project Management

- RAPID is an UAV that can analyze before and after disaster. Transmit hot data during a disaster and performs artificial intelligence integrated image processing.
 - Conducted comprehensive market research, stakeholder coordination, and project roadmap development for startup
-

EDUCATION

- Çankaya University | B.S. in Industrial Engineering | 2021-2026

TECHNICAL SKILLS

- **Programming & Data:** Python (Pandas, Openpyxl, Matplotlib, Tkinter, PyQt5), SQL (PostgreSQL, MSSQL, MySQL, SQLite), C#, VBA, AI/ML Libraries (Prophet, LightGBM)
 - **Industrial Engineering Tools:** GAMS (Mathematical Modeling), Arena Simulation, Operations Research, Statistical Analysis
 - **Enterprise Systems:** ERP Development, MRP Systems, Inventory Management, Supply Chain Optimization
-

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Ethical Hacker – Cisco Networking Academy (2024)
 - McKinsey Forward Program – McKinsey & Company (2024)
 - CCNA v7: Bridging Certificate – Cisco (2022)
 - Introduction to Cybersecurity – Cisco (2023)
 - Python Essentials 2 – Cisco Networking Academy (2024)
 - Advanced Python Programming – BTK Academy (2025)
 - ISO 9001:2015 Quality Management Systems Fundamentals – Acadezone (2025)
 - Machine Learning Summer School – Science Academy / METU (2024)
 - DIA ERP & Business Processes Training – Çankaya University (2025)
 - AI For Everyone – Coursera / DeepLearning.AI (2023)
-

LANGUAGES

- Turkish (Native), English (Fluent)
